The return of the *Wednesday Webinar Series*

Every Wednesday from 12:00pm – 1:00pm MST

December 7, 2016- February 15, 2017

Webinar 1: December 7, 2016: Manual J Review: In one hour we will go through the top 10-15 items to look at when performing a Manual J (Residential Load Calculation) review. We won't spend time building the clock but rather learning how to tell time with our friend, Gil Rossmiller.

To Register go to: <https://attendee.gotowebinar.com/register/7085626042656396546>

Webinar 2: December 14, 2016: IECC Commercial Mechanical Basics: this webinar will cover the requirements found in the IECC for simple mechanical systems, including the requirements for commissioning and the "mandatory options" found in Section C406.

To Register go to: <https://attendee.gotowebinar.com/register/7508699425326987522>

Webinar 3: December 21, 2016: Commercial Lighting and Daylighting: this webinar will go through the lighting and daylighting requirements as found in the 2015 IECC. We will cover when daylighting is required and how to find all of the requirements that are scattered throughout the commercial chapter.

To Register go to: <https://attendee.gotowebinar.com/register/3748297090565615874>

Webinar 4: December 28, 2016: COMcheck Basics: This familiar tool used to show compliance with some of the International Energy Conservation Code's commercial provisions has been overhauled and updated. This session will walk you through how to use COMcheck as well as how to read the reports.

To Register go to: <https://attendee.gotowebinar.com/register/7983268435084427010>

Webinar 5: January 4, 2017: Energy Code- The Top 10 Approach to Efficiency: Having trouble trying to enforce every provision of the IECC? Let's take a look at the different type of commercial buildings and how they use energy. Then we'll look at the concept of, at a minimum, targeting the top 10 code requirements that deal specifically with how each building loses its efficiency.

To Register go to: <https://attendee.gotowebinar.com/register/3249630084462205954>

Webinar 6: January 11, 2017: IECC for Multi-Family Construction: this webinar will cover the basics for complying with the energy code for R-2 Multi-Family dwellings, noting the differences between the residential requirements and commercial requirements based on stories above grade plane. Mechanical Ventilation differences will be discussed as well.

To Register go to: <https://attendee.gotowebinar.com/register/6917178662257953026>

Webinar 7: January 18, 2017: [IECC – Paths to Compliance](#): This session takes a look at the flexibility and options built into the International Energy Conservation Code as well as the various paths of compliance that can be taken and what type of documentation is needed for each path. We will look at how COMcheck, REScheck, ASHRAE 90.1, Energy Raters, compliance software and the "Mandatory" items of the code are affected or put into play depending on the path you choose.

To Register go to: <https://attendee.gotowebinar.com/register/4443409441157299714>

Webinar 8: January 25, 2017: [IECC for Beginners, Descrambling the Code](#): Feel like you need some sort of legal degree to read the Energy Code? You're not alone. This course will take you through the terminology used in the code, concepts behind the requirements and ways to just look at the code differently when you open it next time.

To register go to: <https://attendee.gotowebinar.com/register/6988555658598125826>

Webinar 9: February 1, 2017: [HERS Index and Code Compliance](#): What is a HERS Index? This webinar will reveal who RESNET is and how the HERS Index works and then how it has been adopted into the 2015 IECC.

To Register go to: <https://attendee.gotowebinar.com/register/5715936920145304322>

Webinar 10: February 8, 2017: [Intro to Building Science](#): Building science is now imbedded in the IECC. This webinar offers an introduction into the core principals of Building science which you need to know in order to successfully adopt and enforce the IECC.

To Register go to: <https://attendee.gotowebinar.com/register/6787082247436292098>

Webinar 11: February 15, 2017: [Energy Codes for Log Homes](#): This webinar will look at the options available to designers and contractors when trying to get log homes to comply with the energy codes. We'll go through different standards and compliance tools to find out what might work best for these structures.

To Register go to: <https://attendee.gotowebinar.com/register/6078519571102074114>

Additional webinars will follow with subjects to be determined based on attendee recommendations, stay tuned!
